
Positive Control Lysate for Androgen Receptor Ab-1

Human Cells-16 Lysate

Cat. #MS-443-PCL (250 µg in 0.1 ml) (Ready-To-Use for Western Blotting)

Specificity and Comments:

Human cells-16 have a high level expression of androgen receptor (AR). **NEOMARKERS'** Ab-1 shows a single band at ~110kDa on this positive control cell lysate. The expression of AR is reportedly inversely correlated with histologic grade i.e. well differentiated prostate tumors show higher expression than the poorly differentiated tumors. In prostate cancer, AR has been proposed as a marker of hormone-responsiveness and thus it may be useful in identifying patients likely to benefit from anti-androgen therapy.

Supplied As:

250µg of total protein cell lysate in 0.1ml of 1X PAGE-sample buffer containing DTT.

Known Applications:

- Western Blotting (Use **NEOMARKERS'** Ab-1)
[Load 20ul of the positive control cell lysate onto one lane of mini-gel.]

Storage and Stability:

Store vial below 0°C. When stored below 0°C, this lysate is stable for 12 months.

Limitations and Warranty:

Our products are intended FOR RESEARCH USE ONLY and are not approved for clinical diagnosis, drug use or therapeutic procedures. No products are to be construed as a recommendation for use in violation of any patents. We make no representations, warranties or assurances as to the accuracy or completeness of information provided on our data sheets and website. Our warranty is limited to the actual price paid for the product. NeoMarkers is not liable for any property damage, personal injury, time or effort or economic loss caused by our products.

NEOMARKERS' Other Related Products:

Progesterone Receptor (7 non-competing MAb's of hPRa series), Estrogen Receptor (9 MAb's of AER series covering five different epitopes, and TE111), Vitamin D Receptor (9A7γ.E10.E4), Insulin Receptor (6 MAbs), IGF-1 Receptor (5 MAbs), pS2 (R47/94, same as GE2), and HSP27 (G3.1).

Material Safety Data:

This product is not licensed or approved for administration to humans or to animals. Standard Laboratory Practices should be followed when handling this material. The chemical, physical, and toxicological properties of this material have not been thoroughly investigated. Appropriate measures should be taken to avoid skin and eye contact, inhalation, and ingestion.

For Research Use Only
